-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. In the specification, the footer section indicating information (such as the page number and applicant's personal reference information) must be deleted. The footer section text is printed inappropriately close to the text of the disclosure, and can be mistakenly incorporated as a text of the disclosure upon the allowance of the application.

A correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States,

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-5, 10 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Sonnleitner et al.

Sonnleitner et al. shows a watercraft having a four cycle engine, a water jet pump driven by the engine, and a mechanically driven supercharger [90] provided to draw air into the engine from outside of the engine (see columns 31 and 32). The supercharger is contained within an

Art Unit: 3617

air intake box, which is configured to temporarily store the drawn-in air (see paragraph 5, column 20). The shaft of the supercharger is disposed to rotate in cooperation with the crankshaft [123] (see figures 33, 36 and 38).

Regarding claim 4, the supercharger is considered as being placed behind the engine when observed from an opposite side of the engine, even though the supercharger is not placed aft of the engine.

#### ***Allowable Subject Matter***

4. Claims 6-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Pichler et al. shows a four-cycle engine for boats having a supercharger (see page 4, column 2, as well as figures 18 and 19).
- Christianse, Takahashi, Takahashi et al. ('618 and '356), and Takai et al. show outboard motors having superchargers.
- Purnell et al. shows a method of converting an outboard motor into a pump jet assembly of a watercraft, and can be used to modify the outboard motors cited above.
- Jones, Davis, and Kubo et al. show marine engines having superchargers.

Art Unit: 3617

- Jacobsen, Miyagi et al., Uchida, Tsuboi et al., Shibata, Matsuoka, and Scherenberg show internal combustion engines having superchargers.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ajay Vasudeva whose telephone number is (703) 306-5992. The examiner can normally be reached on Monday-Friday 1:00 pm--5:30 pm.
